EDUCATION

Virginia Tech

Bachelor of Science in Computer Science, **GPA: 3.80/4.00**

Expected Dec 2025

Blacksburg, VA

EXPERIENCE

Software Engineer Intern

Investure

Aug 2025 – Present

Remote

- Improved pipeline accuracy and reliability by implementing a multi-pass validation process that selects the most consistent result, resolving inconsistent outputs and preparing the system for production deployment.
- Incorporated analyst feedback into the React UI, improving usability and reducing document review time.

Software Engineer Intern

Investure

Jun 2025 – Aug 2025

Charlottesville, VA

- Developed a multi-agent pipeline with the OpenAI API to extract structured financial data with 93% accuracy, reducing processing time from hours to minutes and replacing a third-party vendor, saving \$70K+ per quarter.
- Built a React UI for the pipeline, allowing analysts to upload documents and instantly view structured outputs, eliminating the need to send documents to third-party vendors.
- Optimized model prompts and used pytest with historical data to handle edge cases and ensure reliable extraction.
- Collaborated in an Agile environment to deliver improvements and incorporate feedback in weekly sprints.

Undergraduate Teaching Assistant

Virginia Tech Department of Computer Science

May 2024 – Present

Blacksburg, VA

- Held weekly office hours to support 400+ students in Data Structures & Algorithms (Java) and Database Management Systems, answering questions on assignments, projects, and core concepts.
- Resolved 25+ questions weekly, providing guidance on algorithm analysis, SQL query debugging, and project implementation to improve student understanding and performance.

Student Hiring Administrator

Virginia Tech Dining Services

Mar 2024 – Jun 2025

Blacksburg, VA

- Coordinated hiring with an 8-person team, processing applications for 1,000+ student employees each semester.
- Automated applicant processing with Microsoft Power Automate, reducing manual entry time by 5+ minutes per applicant and accelerating offer turnaround.

PROJECTS

HokieTracker | React, FastAPI, PostgreSQL

- Helped 12+ students to secure high-demand courses faster than paid alternatives by building a real-time monitoring system that detected seat availability changes in under 3 seconds.
- Developed a mobile-friendly React UI with push notifications, eliminating manual page refreshes and providing instant alerts when seats opened.

EduGrade | React, Express, Node.js, MySQL

- Supported students in making more informed scheduling decisions by creating a centralized platform that combined official grade distributions with anonymous course reviews across 20,000+ courses.
- Developed REST APIs for real-time data, full-text search, and filtering by course, instructor, and department.

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript/TypeScript, SQL, Kotlin

Frameworks & Libraries: React, Node.js, Express, FastAPI, Jest, Pytest

Databases: MySQL, PostgreSQL, SQL Server

Tools: Git, Docker, AWS (RDS), Azure DevOps, Android Studio
