## EDUCATION

### Virginia Tech

Bachelor of Science in Computer Science, **GPA: 3.80/4.00**

**Expected May 2026**

Blacksburg, VA

## EXPERIENCE

### Software Engineer Intern

Investure

Aug 2025 – Present

Remote

- Extended the LLM-based document extraction pipeline by implementing a multi-run validation process that compares outputs across fields, ensuring consistency and detecting mismatches.
- Designed a majority-vote reconciliation workflow with confirmation passes for discrepancies, improving extraction accuracy from 92% to 99% and preparing the system for production deployment.
- Incorporated analyst feedback into the React UI, improving usability and reducing document review time.

### Software Engineer Intern

Investure

Jun 2025 – Aug 2025

Charlottesville, VA

- Developed a Python-based multi-agent document extraction pipeline with the OpenAI API, achieving 92% accuracy and reducing processing time from hours to minutes, expecting to save \$70K+ per quarter.
- Built a React UI for instant uploads and structured outputs, eliminating a third-party vendor dependency.
- Optimized model prompts and used pytest with historical data to handle edge cases and ensure reliable extraction.
- Collaborated in an Agile environment to deliver improvements and incorporate feedback in weekly sprints.

### Undergraduate Teaching Assistant

Virginia Tech Department of Computer Science

May 2024 – Present

Blacksburg, VA

- Held weekly office hours to support 400+ students in Data Structures & Algorithms (Java) and Database Management Systems, answering questions on assignments, projects, and core concepts.
- Resolved 25+ weekly questions on algorithm design, SQL debugging, and project implementation, improving student comprehension and retention.

### Student Hiring Administrator

Virginia Tech Dining Services

Mar 2024 – Jun 2025

Blacksburg, VA

- Coordinated hiring with an 8-person team, processing applications for 1,000+ student employees each semester.
- Automated applicant processing with Microsoft Power Automate, reducing manual entry time by 5+ minutes per applicant and accelerating offer turnaround.

## PROJECTS

### HokieTracker | React, FastAPI, PostgreSQL

- Built a real-time course monitoring system detecting seat availability changes within 3 seconds, helping 12+ students secure high-demand classes faster than paid tools.
- Designed mobile-friendly React UI with push notifications, replacing manual refreshes with instant seat alerts.

### EduGrade | React, Express, Node.js, MySQL

- Supported students in making more informed scheduling decisions by creating a centralized platform that combined official grade distributions with anonymous course reviews across 20,000+ courses.
- Developed REST APIs for real-time data, full-text search, and filtering by course, instructor, and department.

## TECHNICAL SKILLS

**Languages:** Python, Java, C, JavaScript/TypeScript, SQL, Kotlin

**Frameworks & Libraries:** React, Node.js, Express, FastAPI, Jest, Pytest

**Databases:** MySQL, PostgreSQL, SQL Server

**Tools:** Git, Docker, AWS (RDS), Azure DevOps, Android Studio
