## EDUCATION

|  |  |
|--|--|
| <b>Virginia Tech</b><br>Bachelor of Science in Computer Science, <b>GPA: 3.75/4.00</b> | <b>Aug 2022 – Dec 2025</b><br>Blacksburg, VA |
|--|--|

## EXPERIENCE

|   |   |
|---|---|
| <b>Software Engineer Intern</b><br>Investure  | <b>Aug 2025 – Present</b><br>Remote               |
| <b>Software Engineer Intern</b><br>Investure  | <b>May 2025 – Aug 2025</b><br>Charlottesville, VA |
| <b>Undergraduate Teaching Assistant</b><br>Virginia Tech Department of Computer Science | <b>May 2024 – Dec 2025</b><br>Blacksburg, VA      |
| <b>Student Hiring Administrator</b><br>Virginia Tech Dining Services                    | <b>Mar 2024 – May 2025</b><br>Blacksburg, VA      |

**Software Engineer Intern**  
Investure

- Extended the LLM-based extraction pipeline with a multi-run validation framework to detect cross-field inconsistencies, surfacing errors earlier and improving data reliability.
- Designed a majority-vote reconciliation workflow with confirmation passes, resolving mismatches and raising accuracy from 92% to 99%, preparing the pipeline for production.
- Incorporated analyst feedback into the React UI, reducing document review time and improving usability.

**Software Engineer Intern**  
Investure

- Built an AI-powered ETL pipeline in Python with OpenAI API, FastAPI, and SQLAlchemy, automating document extraction at 92% accuracy and cutting processing time from hours to minutes, saving \$70K+ per quarter.
- Developed a React upload portal to manage structured outputs, removing reliance on a third-party vendor.
- Optimized model prompts and used pytest with historical data to handle edge cases and ensure reliability.
- Collaborated in Agile sprints, delivering iterative improvements and incorporating feedback into the pipeline.

**Undergraduate Teaching Assistant**  
Virginia Tech Department of Computer Science

- Supported over 400 students in Data Structures & Algorithms (Java) and Database Management Systems through weekly office hours, answering questions on assignments, projects, and core concepts.
- Addressed 25+ weekly questions on algorithm design, SQL debugging, and project implementation, improving comprehension and course performance.

**Student Hiring Administrator**  
Virginia Tech Dining Services

- Coordinated hiring with an 8-person team, processing applications for 1,000+ student employees each semester.
- Designed and deployed automated workflows using Microsoft Power Automate and Power Apps, reducing manual entry time by 5+ minutes per applicant and accelerating offer turnaround.

## PROJECTS

|  |  |
|--|--|
| <b>HokieTracker</b>   React, FastAPI, PostgreSQL |  |
| <b>EduGrade</b>   React, Express, Node.js, MySQL |  |
| <b>HokieTracker</b>   React, FastAPI, PostgreSQL |  |

**HokieTracker** | React, FastAPI, PostgreSQL

- Built a real-time course monitoring system detecting seat availability changes within 3 seconds, helping 12+ students secure high-demand classes faster than paid tools.
- Designed mobile-friendly React UI with push notifications, replacing manual refreshes with instant seat alerts.

**EduGrade** | React, Express, Node.js, MySQL

- Supported students in making more informed scheduling decisions by creating a centralized platform that combined official grade distributions with anonymous course reviews across 20,000+ courses.
- Developed REST APIs for real-time data, full-text search, and filtering by course, instructor, and department.

## TECHNICAL SKILLS

**Languages:** Python, JavaScript/TypeScript, Java, SQL

**Frameworks & Libraries:** React, Node.js, FastAPI, Spring Boot, Express, SQLAlchemy, Jest, Pytest, JUnit

**Databases:** PostgreSQL, MySQL, SQL Server

**Tools:** Linux, GitHub, Git, Docker, AWS, Azure DevOps
